

## Board of Directors

William Morris, President  
Lisa Degen, Vice President  
Michael Moore, Director  
Mark Silano, Treasurer  
Cynthia Wagstaff, Secretary

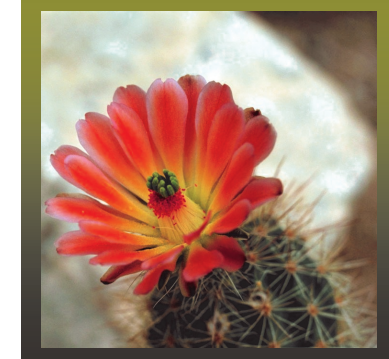

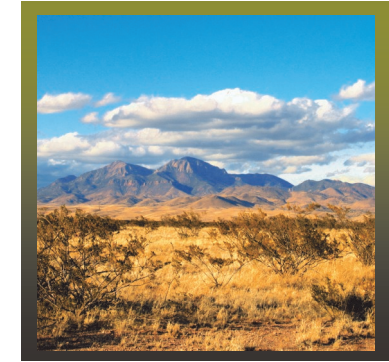

## Advisory Board

Lucy Moore, Facilitator, Santa Fe, NM  
Amy Lewis, Hydrologist, Santa Fe, NM  
Jennifer Steketee, Veterinarian/Business  
Owner, Santa Fe, NM  
Deborah Finch, Ph.D, Research Wildlife Bi-  
ologist, Albuquerque, NM

Seventh Generation Institute thanks the following organizations and individuals for their generous support:

- New Mexico Partners for Fish and Wildlife
- Patagonia Inc.
- The Biophilia Foundation
- The Norcross Wildlife Foundation
- The ESRI Conservation Program
- Harlot Clothing Company
- ZuliStudios
- OnFocus Photography
- Individual supporters, members and volunteers of Seventh Generation Institute

To add your support, please visit our website at [www.seventh-generation.org](http://www.seventh-generation.org). You can become a member of Seventh Generation Institute, make a donation, volunteer, or purchase coffee, tee shirts or other products that support conserving the natural heritage of New Mexico.

Bringing Together People  
and Science for  
Conservation

# Seventh Generation Institute

## About 7GI..

Founded in 2006, Seventh Generation Institute is a growing nonprofit conservation organization. 7GI is based in Santa Fe and works almost exclusively in New Mexico.

*"In every deliberation, we must consider the impact of our decisions on the next seven generations."*

- Iroquois Confederation -

## What We Do

Our mission is to conserve biological diversity, foster sustainable resource use, and ensure an optimistic future for the human communities that depend on the natural world, through excellence in science and collaboration.

Our guiding

philosophy is that successful conservation is founded in both applied science and

strong community participation. We partner with agencies, user groups, tribes, private land owners, and other nonprofit and community-based organizations to develop new tools and information, restore ecosystems, and improve resource stewardship.

## Programs and Projects

### *Building Riparian Resilience through Beaver Restoration.*

This is a multi-year project to restore stream corridors and protect them against climate change by restoring the native beaver population in New Mexico. Now in its second year, the project has completed an analysis of potential suitable beaver habitat, a survey of private landowner attitudes toward beaver, and the live-trapping and relocation of beaver from areas where they are not wanted.

### *Citizen Science*

"Citizen Scientists" are volunteers who receive training and work as field assistants in scientific studies. A cross-cutting program that is currently being formed, our citizen science program will train (not so very) ordinary citizen volunteers to do cutting-edge restoration, monitoring, and research.

### *Contract Services*

If you are a landowner, agency or tribal representative, or a member of a nonprofit organization, and would like assistance or a project partner, Seventh Generation Institute may be able to help. 7GI provides reduced-cost services in management planning, group facilitation, educational programs, ecotourism development and other conservation-related activities. For more information, please view our website at [www.seventh-generation.org](http://www.seventh-generation.org) or contact us at 505 216 1150.

## How You Can Help

### Volunteer

Volunteering your time and skills is the ultimate gift. The volunteers at Seventh Generation Institute say that they receive more than they give – in satisfaction and in knowing that they made a real difference. Our volunteers go far beyond menial tasks - they help tackle the meaty work of citizen science and administering the organization. For information on current volunteer opportunities, visit our website at [www.seventh-generation.org](http://www.seventh-generation.org).

### Financial Support- small and large

In these challenging economic times, your support matters more than ever. While funding for conservation has been reduced, the need has only grown.

Your tax-deductible contribution can help keep New Mexico's ecosystems, healthy, beautiful and working to support a vibrant economy and culture. Contributions of any size are always welcome.
